Read the following passage and answer the Question No. 1

Once I read in a Rajasthan Tourism Department's brochures that visitors to Jaipur are spoiled for choices. Now after my recent visit to Jaipur I can say that yes, this time these brochures are right. There is so much to see in Jaipur, not only are the city's forts, palaces, gardens and temples, palaces turned into magnificent hotels, each proves a rewarding experience in itself because they can keep you absorbed for long hours at a stretch. Being a tourist I can say that Jaipur has much to offer visitors – everything from pageants and festivals to extraordinarily clad people, a wealth of handicrafts, a royal legacy of palaces, and sightseeing. Best thing I like in Jaipur was Jantar Mantar: a monument at first glance it looks like a collection of mammoth, bizarre sculptures but it is really a wonderful piece of art and science. My guide provided fascinating explanation how each of instrument work.

I love food and Rajasthan is indeed a heaven for my kind of people. Rajasthan's capital city Jaipur force one to think pink (the colour of hospitality). The delicious Rajasthani Thali, consisting Dal, Bati, Churma and lots of ghee all make it so good and tempting. I have one word for Rajasthani cuisine and that is 'yummy'. Noticeable to mention 'Chokhi Dhani' – wonderful display of Rajasthani culture for mere 300 Rupees is not a bad deal. Moreover, you are also getting food in that money, amazing, the service element involve in food was very good. Everybody there was greeting guests with 'Ram Ram Sa'. One can wanders around and watches the various entertainments from the bizarre to more bizarre.

For each correct answer to a question, 2 marks will be awarded. However, if the answer is wrong 1/2 mark will be deducted. For example, these marks will be calculated as under:

- P = Number of correct answers.
- Q = Number of wrong answers
- R = Number of unattempted questions

(An unattempted question means, the bubbles corresponding to that question is left blank).

Then the final score will be $2P - 1/2Q$, calculated to second place of decimal.

It will also be checked that $P + Q + R = \text{Total No. of questions in the Paper.}$
